

Automatic **coin** adjustment **NEW!**

 english language | date 11.2010

At a glance!

- minimal setting-up times
- very easy usage
- 3 types of lighting for different coins/medals (mat & brilliant structure)

Save **time** & costs

With the automatic coin adjustment the step of manual adjustment is no longer needed. The coin is **turned and printed fully automatically**.

Therefore this system is suitable not only for **manual working stations** but also for **automations** with handlings.

Quality & speed

Three different **types of lighting** with parameters free to be defined ensure that the coin is identified fast and well.

By a **computer system** the image of the **camera** is compared with a memorized reference image. The fixture is turned by the **calculated angle**.

These technical data specifications refer to the state at the time of printing. We reserve the right to modify specifications in the interest of a continuous program of further development. Subject to deviations and mistakes.
